

```

1  ##Created 09/11/2021 By Roger Williams
2  ##
3  ##What it does:
4  ##
5  ##Creates a 7ZIP file of the Desktop and Documents folders on the Sales2/Sales4 computers
6  ##ZIP is created on drive G -> filehubbackups->sales->backups-><computer name>
7  ##
8  ##
9  ##
10 ##
11 $7Zip="7z.exe"
12 $Date = Get-Date -Format "yyyyMMdd"##user computer name and profile
13 ##user folder and computer name
14 $Computer=Get-ChildItem Environment::COMPUTERNAME
15 $UserFolder=Get-ChildItem Environment::USERPROFILE
16 ##prepare variables for first ZIP file
17 $ZipName="\\FILEHUB\FileHub_Backups\Sales\Backups\" + $Computer.Value +
18 "\DocumentsBackup_" + $Date + ".zip"
19 $ZipPath= $UserFolder.Value + "\Documents\*.*"
20
21 ##now create zip backup
22 ##NOTE: make sure 7z.exe location is in the system path
23 $ProcessStartInfo=New-Object System.Diagnostics.ProcessStartInfo
24 $ProcessStartInfo.FileName = $7Zip
25 $ProcessStartInfo.WorkingDirectory = "C:\Program Files\7-Zip"
26 $ProcessStartInfo.Arguments = "a -r -mx=7 " + $ZipName + " " + $ZipPath
27 $Process = [System.Diagnostics.Process]::Start($ProcessStartInfo)
28 $Process.WaitForExit(-1)
29
30 ##prepare variables for second ZIP file
31 $ZipName="\\FILEHUB\FileHub_Backups\Sales\Backups\" + $Computer.Value + "\DesktopBackup_"
32 + $Date + ".zip"
33 $ZipPath= $UserFolder.Value + "\Desktop\*.*"
34
35 ##now create zip backup
36 ##NOTE: make sure 7z.exe location is in the system path
37 $ProcessStartInfo=New-Object System.Diagnostics.ProcessStartInfo
38 $ProcessStartInfo.FileName = $7Zip
39 $ProcessStartInfo.WorkingDirectory = "C:\Program Files\7-Zip"
40 $ProcessStartInfo.Arguments = "a -r -mx=7 " + $ZipName + " " + $ZipPath
41 $Process = [System.Diagnostics.Process]::Start($ProcessStartInfo)
42 $Process.WaitForExit(-1)
43
44 Stop-Computer -ComputerName $Computer.Value
